

Prathik Vittal Beechanahally Prahlad

San Jose, CA | 213-696-7196 | prathikvittal15@gmail.com | [LinkedIn](#) | [GitHub](#) | [Portfolio](#)

Professional Summary

Master's in Computer Science with 2+ years of industry experience as a Software Engineer, specializing in agentic AI systems, LLM orchestration, and full-stack development. Experienced in building autonomous AI agents, real-time data pipelines, and cloud-native applications across global production environments. Looking for a Software Engineer role where I can apply my skills to develop robust, high-performance software with significant impact.

Experience

ProTee United

Bengaluru, India

Software Engineer

Aug 2022 – July 2024

- Developed and improved gaming features for The Golf Club 2019 and ProTeePlay using Agile methodologies, utilizing good problem-solving skills to enhance gaming features and improve player experience.
- Developed a cloud-native technical assistance portal using Serverless Computing, resulting in a 30% decrease in incoming support tickets on average.
- Utilized Vertex AI to enable real-time data processing and inference between simulator hardware and back-end systems, ensuring secure communication using API Security Best Practices.
- Resolved customer-reported bugs and support tickets using Mantis Bug Tracker and Zendesk, triaging issues and linking fixes to tracked defects to ensure timely resolution and clear communication across engineering and support teams.
- Managed version upgrades using automated CI/CD pipelines to maintain 94% uptime and system stability in global cloud environments.

Compsoft Technologies

Bengaluru, India

Machine Learning Intern

Aug 2021 – July 2022

- Built and evaluated bird species classification models using ResNet, achieving 92% classification accuracy and incorporating MLOps practices for model training, versioning, testing, and performance monitoring.
- Developed real-time cattle object detection systems using YOLO and CNNs, improving livestock tracking efficiency by 35% through cloud-based inference workflows.
- Performed sentiment analysis on 50,000+ tweets using NLP techniques, following Agile Development with unit testing to enhance classification accuracy by 28% and generate actionable social media insights.

Projects

Agentic AI Assistant | Next.js, DrizzleORM, PostgreSQL, OpenAI API, Inngest, Stream SDK

- Engineered a full-stack AI-powered video conferencing platform with custom AI agents, automatic meeting transcription and summarization, smart transcript search, background job orchestration, and secure authentication.

Digital Disposable Events | Next.js, React, TypeScript, Prisma, PostgreSQL, NextAuth, AWS S3 & CloudFront

- Built and deployed on AWS, a full-stack platform that turns any phone browser into a disposable camera - guests scan a QR code to capture a host-set shot limit with zero app install or login, streaming into a host-moderated gallery served by a serverless S3 & CloudFront pipeline with UUID-keyed caching, bulk ZIP export, and NextAuth-secured PostgreSQL/Prisma storage.

Technical Skills

- Programming Languages:** Python, JavaScript, TypeScript, Java, C++, C, Go, Solidity, SQL, PHP, Shell Scripting, HTML/CSS
- Frameworks & Libraries:** React.js, Next.js, Node.js, Spring Boot, TailwindCSS, Pandas, NumPy, Scikit-learn,
- Cloud & DevOps:** Google Cloud, AWS, Docker, Kubernetes, Git, GitHub, Jenkins, CI/CD Pipelines, REST APIs, FastAPI, Microservices, WebSockets, NATS, Kafka, Postman, CloudFront
- Databases:** MySQL, MongoDB, PostgreSQL, DynamoDB, Convex, SQL Server
- AI & Machine Learning:** TensorFlow, Vertex AI, OpenAI APIs, Gemini APIs(Live, Lyria, Veo, & Nano Banana), ResNet, YOLO, NLP, Sentiment Analysis, MLOps, Model Versioning, Model Interpretability (LIME), Data Visualization
- Concepts & Tools:** Data Structures & Algorithms, System Design, OOP, Database Management Systems, Networking, Operating Systems, Application Security, Agile/Scrum, Figma, Jira, Google Workspace, Microsoft Office Suite

Education

California State University

Fullerton, CA

Master of Science, Computer Science | GPA: 3.9/4.0

May 2026

Coursework: Advanced Computer Networking, Advanced Blockchain Technologies, Artificial Intelligence, Web Backend Engineering, System Security, Software Standards & Requirements, Computer System Architecture.

Visvesvaraya Technological University

Bengaluru, India

Bachelor of Engineering, Computer Science | GPA: 8.4/10.0

July 2022

Certifications & Awards

Google Cloud | ML Engineer Learning Path, Introduction to Gen AI Learning Path, Google Cloud Computing Foundations

Courtroom Chaos | React, Node.js, WebSockets, Google Gemini API (Live, Lyria, Nano Banana)

- Built in under 24 hours at the UCLA Google DeepMind Hackathon (Runner-Up & Judges' Favorite), a real-time multiplayer AI courtroom game with a voice-interactive AI judge that listens, interrupts, assigns roles, and delivers dynamic verdicts.
