

Prathik Vittal Beechanahally Prahlad

San Jose, CA - Open to relocation | 213-696-7196 | prathikvittal15@gmail.com | [linkedin.com/in/prathikvittalbp](https://www.linkedin.com/in/prathikvittalbp) | [GitHub](#) | [Portfolio](#)

Professional Summary

Master's in Computer Science with **2+ years of industry experience** as a Software Engineer, specializing in **agentic AI systems, LLM orchestration, and full-stack development**. Experienced in building **multi-agent AI systems, LLM-powered full-stack applications, and real-time data pipelines** deployed across cloud-native production environments.

Education

California State University

Master of Science, Computer Science | GPA: 3.9/4.0

Fullerton, CA

08/2024 – 05/2026

Coursework: Advanced Computer Networking, Advanced Blockchain Technologies, Artificial Intelligence, Web Backend Engineering, System Security, Software Standards & Requirements, Computer System Architecture.

Visvesvaraya Technological University

Bachelor of Engineering, Computer Science | GPA: 8.4/10.0

Bengaluru, India

08/2018 – 07/2022

Experience

ProTee United

Software Engineer

Bengaluru, India

08/2022 – 07/2024

- Developed and shipped gameplay features for **The Golf Club 2019** and **ProTee Play** using **Agile/Scrum methodologies**, contributing to a **20%** improvement in player engagement metrics across major releases.
- Created a **cloud-native** self-service portal that enabled customers to resolve common simulator issues independently, reducing support tickets by **30%**.
- Integrated **Vertex AI** for real-time data processing between simulator hardware and back-end systems, reducing inference latency by **25%** on the endpoints I owned while following **API security** best practices.
- Worked directly with customers to **diagnose real-world simulator issues** and **ship fixes** and improvements, tracking defects and resolutions in **Mantis**.
- Contributed to production releases via **CI/CD** pipelines, reducing deployment issues during version upgrades.

Compsoft Technologies

Software Engineer Intern

Bengaluru, India

08/2021 – 07/2022

- Built and evaluated **bird species classification models** using **ResNet**, applying structured problem-solving to achieve **96%** classification accuracy and incorporating **MLOps** practices for model training, versioning, testing, and performance monitoring.
- Developed **real-time cattle object detection systems** using **CNNs**, improving livestock tracking efficiency by **35%** through cloud-based inference workflows.
- Performed sentiment analysis on **50,000+** tweets using **NLP**, collaborating cross-functionally within Agile development and **unit testing** practices to enhance classification accuracy by **28%** and generate actionable social media insights.

Projects

AI Workforce | Next.js, TypeScript, LangGraph, CrewAI, MCP, NATS, PostgreSQL, Claude Agent SDK

- Engineered a **distributed multi-agent AI** platform where specialized agents handle **code review, planning, and task execution** while coordinating through **NATS** messaging. Designed a modular architecture which supports **12 concurrent agents** with secure, role-based access to **4 MCP-integrated tools**.

Courtroom Chaos | React, Node.js, WebSockets, Google Gemini API (Live, Lyria, Nano Banana)

- Built a real-time multiplayer courtroom game in under 24 hours at the **UCLA Google DeepMind Hackathon** (Runner-Up & Judges' Favorite), where a **voice-interactive AI** judge listens to players, interrupts conversations, assigns roles, and delivers dynamic verdicts for up to **8 concurrent players** over **WebSockets**.

Digital Disposable Events | Next.js, React, TypeScript, Prisma, PostgreSQL, NextAuth, AWS S3 & CloudFront

- Architected a **disposable event camera** that lets guests scan a **QR code**, capture a limited number of photos, and upload them directly from the browser without installing an app. Designed an **AWS-backed** image pipeline using **S3** and **CloudFront** for scalable photo delivery, secure uploads, and bulk export while storing event metadata in PostgreSQL.

Technical Skills

- Programming Languages:** Python, JavaScript, TypeScript, Java, C++, C, Go, Shell Scripting, HTML, CSS
- Frameworks & Libraries:** React.js, Next.js, Node.js, PyTorch, Pandas, NumPy, Scikit-learn, LangGraph, CrewAI
- Cloud & DevOps:** Google Cloud, AWS, Docker, Kubernetes, Git, GitHub, Jenkins, CI/CD Pipelines, REST APIs, GraphQL, FastAPI, Microservices, WebSockets, NATS, Kafka, Postman, CloudFront
- Databases:** MySQL, MongoDB, PostgreSQL, DynamoDB, Convex, SQL Server
- AI & Machine Learning:** TensorFlow, Vertex AI, OpenAI APIs, Claude APIs, Gemini APIs (Live, Lyria, Veo, & Nano Banana), ResNet, NLP, Sentiment Analysis, MLOps, Model Versioning, Model Interpretability (LIME), Data Visualization, Multi-Agent Systems, MCP
- Concepts & Tools:** Data Structures & Algorithms, System Design, OOP, RBAC, Database Management Systems, Networking, Operating Systems, Application Security, Agile/Scrum, Jira, Zendesk(CRM), Mantis

Certifications

Google Cloud | ML Engineer Learning Path, Introduction to Gen AI Learning Path, Google Cloud Computing Foundations
