

Prathik Vittal Beechanahally Prahlad

San Jose, CA | 213-696-7196 | prathikvittal15@gmail.com | [LinkedIn](#) | [GitHub](#) | [Portfolio](#)

Professional Summary

Master's in Computer Science with **2+ years of industry experience** as a Software Engineer, specializing in **agentic AI systems, LLM orchestration, and full-stack development**. Experienced building **multi-agent AI systems, LLM-powered full-stack applications, and real-time data pipelines** deployed across cloud-native production environments.

Experience

ProTee United

Software Engineer

Bengaluru, India

Aug 2022 – July 2024

- Delivered **10+ gameplay features** for The Golf Club 2019 and ProTeePlay across **4 Agile sprints**, improving player engagement metrics by **20%**.
- Developed a **cloud-native technical assistance portal** using **Serverless Computing**, resulting in an average **30% decrease** in incoming support tickets.
- Reduced hardware-to-backend inference latency by **25%** by integrating **Vertex AI** for real-time data processing, enforcing **API security best practices** across all simulator endpoints.
- Triaged and resolved **100+ customer-reported bugs** via **Mantis** and **Zendesk**, reducing average ticket resolution time by **20%** through structured defect tracking and cross-team communication.
- Maintained **94% uptime** across global cloud environments by engineering automated **CI/CD pipelines** that streamlined version upgrades and reduced deployment failures by **30%**.

Compsoft Technologies

Software Engineer Intern

Bengaluru, India

Aug 2021 – July 2022

- Built and evaluated **bird species classification models** using **ResNet**, achieving **92% classification accuracy** and incorporating **MLOps** practices for model training, versioning, testing, and performance monitoring.
- Developed **real-time cattle object detection systems** using **CNNs**, improving livestock tracking efficiency by **35%** through cloud-based inference workflows.
- Boosted sentiment classification accuracy by **28%** on a **50,000+ tweet dataset** by fine-tuning **NLP models**, delivering insights that directly informed social media strategy.

Projects

AI Workforce OS | Next.js, TypeScript, LangGraph, CrewAI, MCP, NATS, PostgreSQL, Claude Agent SDK

- Engineered a **distributed multi-agent AI workforce OS** where each node runs a **permission-scoped agent** (PM/TL/SDE/QA) that mirrors their authority, serving its user as a **LangGraph copilot** for code review, debugging, and planning via **MCP tools** (GitHub/Jira/filesystem).
- Agents gossip work with teammate agents over **NATS team-boundary channels** while a **CrewAI lead agent** orchestrates task assignment and auto-generates **standups with velocity and blocker insights**, all enforced by an **RBAC control plane**.

Digital Disposable Events | Next.js, React, TypeScript, Prisma, PostgreSQL, NextAuth, AWS S3 & CloudFront

- Full-stack event photo platform turning any phone browser into a **disposable camera** - guests scan a **QR code** to capture photos with **zero app install or login** required.
- Implemented host-moderated gallery with **AWS S3 & CloudFront** delivery, **UUID-keyed caching for sub-100ms load times**, bulk **ZIP export**, and **NextAuth-secured PostgreSQL/Prisma** storage.

Technical Skills

- Programming Languages:** Python, JavaScript, TypeScript, Java, C++, C, Go, Shell Scripting, HTML, CSS
- Frameworks & Libraries:** React.js, Next.js, Node.js, Spring Boot, Pandas, NumPy, Scikit-learn, LangGraph, CrewAI
- Cloud & DevOps:** Google Cloud, AWS, Docker, Kubernetes, Git, GitHub, Jenkins, CI/CD Pipelines, REST APIs, FastAPI, Microservices, WebSockets, NATS, Kafka, Postman, CloudFront
- Databases:** MySQL, MongoDB, PostgreSQL, DynamoDB, Convex, SQL Server
- AI & Machine Learning:** TensorFlow, Vertex AI, OpenAI APIs, Claude APIs, Gemini APIs (Live, Lyria, Veo, & Nano Banana), ResNet, NLP, Sentiment Analysis, MLOps, Model Versioning, Model Interpretability (LIME), Data Visualization, Multi-Agent Systems, MCP
- Concepts & Tools:** Data Structures & Algorithms, System Design, OOP, RBAC, Database Management Systems, Networking, Operating Systems, Application Security, Agile/Scrum, Jira

Education

California State University

Master of Science, Computer Science | GPA: 3.9/4.0

Fullerton, CA

May 2026

Visvesvaraya Technological University

Bachelor of Engineering, Computer Science | GPA: 8.4/10.0

Bengaluru, India

July 2022

Certifications & Awards

Google Cloud | ML Engineer Learning Path, Introduction to Gen AI Learning Path, Google Cloud Computing Foundations

Courtroom Chaos | React, Node.js, WebSockets, Google Gemini API (Live, Lyria, Nano Banana)

- Built in under 24 hours at the UCLA **Google DeepMind Hackathon** (Runner-Up & Judges' Favorite), a **real-time multiplayer AI** courtroom game with a **voice-interactive AI** judge that listens, interrupts, assigns roles, and delivers dynamic verdicts.
